Nicole Strickland has been interested in the supernatural since childhood. In addition to her innate psychic and empathic abilities, Nicole's experience in the fields of counseling, education, psychology and social work give her a unique perspective on studying the unknown. She is known for her gentle and humble approaches to working with the spirit realms, her clients and the paranormal field at large.

for Laguna Woods Village residents and their guests only

## Afterlife Chronicles with Nicole Strickland

Nicole will be speaking to us on the afterlife, what it is and examining the profound connectedness between the living realm and the afterlife. She will discuss some of the theories relating to life after death, collective consciousness, the soul and Quantum Physics, as well as some others. She has had a few profound afterlife encounters with deceased loved one and friends that she will share.

There will be a question-and-answer session after her presentation, time permitting.

Nicole is the founder/director of the well-respected San Diego **Paranormal** Research Society and has been featured in numerous media outlets. In addition to her speaking and writing projects, she co-hosts the long-running Haunted Voices Radio with Todd Bates and also hosts the Afterlife Chronicles, which was recently selected by Feedspot as one of the top programs on the afterlife.

Nicole holds a B.A. degree in Media Arts / Journalism from the University of Arizona and an M.S. in Educational Counseling from National University. She plans to pursue a PhD in Parapsychology.
