

Ceramic Slipcasting - Bubbles Glazing Workshop (5-26-2022)

Our Workshop / Demo for technique of glazing with bubbles was attended with great enthusiasm on Thursday May 26th.

Members learned different ways to glaze while blowing large, medium and small bubbles with combining or using a single shade of color.

Linda Gross was equally excited to show us endless possibilities for varied pieces of greenware and bisque.

Below are some "candid" pictures submitted by Gul.
