

President's Message September/October

Mac Club Membership

Due to the COVID-19 shutdown, the Mac Club was closed most of last year and the first half of this year, 2021. As a result, the club's services, classes, and access to the Learning Center was not available during this time. As we are approaching our annual membership renewal drive, the Board of Directors has considered the operating circumstances of this year.

The Board is pleased to announce that once again all Mac Club members will have their term of membership extended through the end of year 2022. If you were a member in 2020 or joined in 2021 your term of membership is extended through December 31, 2022. No action is required on your part.

The Board and all our volunteers want to thank the members for their enthusiastic return to the lab and participation in our classes since reopening.

Gene Hollaway
President, Mac Club
