

PRESIDENT'S MESSAGE

Mac Club

June, 2023

I'm happy to announce that the club is adding another iPhone class. The popularity of the iPhone continues to increase in the Village and the club is growing along with it. For many years, we have presented an iPhone class on Fridays. Starting in June, we have added another class on Wednesday afternoons. Thanks to a new volunteer instructor, we are able to add this new class. Hopefully, if your schedule has prevented you from attending the Friday class, having an additional class on Wednesdays will meet your needs. Take advantage of this new schedule and meet our new instructor, Annie.

We often get questions from visitors about buying a new Mac computer, i.e., what computer can meet my needs? The club has responded to your questions by purchasing a new M2 macMini. Now, you are able to see this less expensive but very adequate computer in action at the lab. This addition adds to our options for you to investigate before buying. Come in and check out our iPads, MacBook Airs, iMacs, and now the macMini.

The Learning Center is open five days a week (except for holidays) from 9:00 AM to 3:00 PM. The class calendar and other club information can be found at TheMacClub.org
